FREE OPIOID SAFETY SUPPORT SESSIONS

for Frontline Clinicians

We know that primary care clinicians have many competing demands.

Amidst the daily challenges of providing patient care, staying abreast of the latest opioid research, prescribing guidelines, and best practices can be a daunting task for clinicians.

We're here to help you meet your specific needs.

Our team of trained outreach educators can share best practices, resources, and tools to help streamline your workflow and improve outcomes for your most vulnerable patients. We can connect with you virtually at a time that works best with your busy schedule.

Sign up for a free, personalized support session.

Our academic detailing program is designed to support your needs around:

- Safe and effective chronic pain management
- Evidence-based non-opioid treatment options
- Tapering chronic opioids to safe levels
- Reducing risk for high-risk patients
- Identifying patients who may have opioid use disorder
- Exploring harm reduction and medication-assisted treatment options
- Compliance with opioid prescribing guidelines
- Registering with the NC Controlled Substances Reporting System

To schedule a session that may include CME at no cost, click the button below or contact **Kyle Adams, BS**, Program Logistics Specialist at kyle.adams@mahec.net.
